News From Your TOWN HALL

The Mayor has been picking up dusky citizens who seem not to be working and checking on their excuses—and they are very very emphatic in declaring legitimate excuse.

The law enforcement officers outside of town all seem to be scared to death of the FBI, and the feds are not too popular with regard to venagance. They should be, if they practice venagance, but insisting that every able bodied man work 5 to 6 days a week for SOMEBODY doesn't come under the head of peonage.

There are laws on the books of Florida providing for prosecution for vagrancy. The attorney general says so, and so do other legal students of experience and high standing.

Should there be fear of prosecution of peonage when your son is taken with or without his consent, put in the army, and subjected to death, or maiming for life, at 50 per cent, when the laws of the state are so strict, and the man for whom laborers do a reasonable day's work at present inflated wages? We don't think so, nor do we think the Federal government will attempt any such prosecution, even with the rabid urging of quadron or octroon legal lights, or their misguided socialistic friends.

Caldwell's Lesson In Punctuality Effective

It has been a notorious fact that the "dear peepul" who go to Tallahassee to meet with the I. I. Board are late in arriving there for the indefinite stay. Meetings were called for ten or eleven o'clock and sometime the Board Members came trooping in from half hour to two hours late, or not at all and left just as quickly. Then came up you had to be on hand, and there was no telling when it would come up.

However, Caldwell had the Board members decide to call the meetings at certain hours with a five minute late arrival quota, and he adjourned a couple of meetings promptly on the expiration of the five minute leave.

Tuesday afternoon the I. I. Board was to meet at 2:30, but there was no sign of them there to do business with the Board. Nathan Mayo not under the wire, and Caldwell, still standing in his place since his entrance at 2:30 said: "As much as I hate to do it, the I. I. Board members are late in arriving at the meetings, and the lack of a quota, until its regular meeting date, next Tuesday."

Larson was less than 50 feet away, having been stopped by a friend in the hall; Col. Lee waddled in ten minutes late after starting from a right pocket from the blind girl stand, and Tom Watson led an interviewee down the hall at 2:45.

Caldwell says 2:30 means no later than 2:35: The Board must the rule. There's a strong suspicion that the late meeting is called at 11, 2 or 4, there will be a quorum here.

Farmers Invited

The Experiment Station has over 40 lines from various sources of different varieties of seedlings at the moment, inviting farmers to come by and inspect them, as they are beginning to head.

Improved lines and varieties are being sought for the muck lands, and this test should be interesting to watch as it is developing.

Fred Strickland Injured In Action

According to word received by Mrs. J. W. Miller, her son, Private Fred Strickland was injured action January 20, 1945, in France where he is serving with an engineering corps. A V-mail letter has just arrived from him stating that he was in a hospital suffering from injuries of his right foot, left ankle and leg.

H. P. W. Club Meeting Announced

An important meeting of the Business and Professional Women's Club will be held at the Nurses' Home of the Migratory Labor Hospital next Tuesday evening at 7:30. President Mrs. Lee Clegg is urging all members to attend.

Visitors Attend Lions Meeting

Mayo Has Ramie Shirt Product Of Local Prison Farm

Mayo's Efforts Bringing Definite Results In Ramie As Glades Crop

Commissioner Mayo, is the proud possessor of a loose woven sports type shirt made from ramie produced at the Prison Farm which he has only recently moved by laundering and will outlast a dozen of the best type shirts made of other materials.

The Sea Island Cotton Mills took the fiber processed it and then made the shirt as a first record of the Commissioner's work in ramie.

There came along with the shirt a piece of packing made by John Manville from ramie made by the U. S. Navy. This packing is the basis of a great many garments older than \$12,000 to the Budget's Commission addition to the Board of Controls original suggested budget.

One official dubbed a committee of Glades farmers a "pioneering outfit" a previous meeting, and Commissioner Mayo with a statement that he had to contend with such every budgeting year. In fact he stretched the rule of cordiality which usually prevails with a compliment which he had not otherwise given free.

John Kidd, ramie expert for the John Manville outfit offered to contract for 10,000,000 pounds of ramie of the same quality and condition as that grown on the Prison farm for use by his company in manufacture of packing for the U. S. Navy.

The Pontiac, a red skinned variety has shown up well. Of the white skin varieties Sequoia, Sabgo and Sequoia will recover further use commercially than they have already around Hastings. The Sequoia has a copper colored skin—about the size of a tanned arm—while the Sabgo has a pure white skin when dried.

All three varieties, Pontiac, Sabgo and Sequoia will recover from a frost that kills the Red Bliss. Some of these have recovered from the December 19th frost and outyielded the Bliss.

The Pontiac is a cross between the two, and the Ramie: Sabgo is Chippewa x Katahdin, while Sequoia is Green Mountain x Katahdin. The latter two white skin varieties are later maturing than the Red Bliss.

Outlook is good for a few more years in the fall planting in the fall planting. All will be planted again this coming spring for further trials here.

New Potato Crosses Promise Advantages For Local Growers

Supplementary to experiments in potato production now there have been carried on by the local station some variety tests on potatoes which have promise of advantage to present red blist growers.

The USDA furnished some 15 varieties of potato seedlings these were tested with some interesting results.

Palm Lake Baptists Meet In Belle Glade

Visitors was served to over 150 visiting delegates to a conference of the Palm Lake Association of the Baptist church by the ladies of the First Baptist church.

Mr. T. R. Allen, President discussed "Easing Christ" and the Rev. A. D. Dawson, newly elected missionary of the Association spoke on missions.

Committee Chairmen made reports and Mrs. E. R. Powers was appointed publicity chairman.

The following were among the visitors: Sout. Bay, Mrs. Lynn, Mrs. McAllister, Mrs. Prevatt, Mrs. L. O. Ratley, Mrs. F. W. Mutchler, Mrs. M. D. Hardy, and Mrs. E. Best: Lake Harbor, Mrs. E. Clemons, Mrs. J. E. Harter, Mrs. H. B. Bowman, Miss Mary Clements, Miss Imogene Heisler and the Rev. C. L. Clemmons.

The following local members attended in serving at the dinner: Mrs. J. W. Rashley, Mrs. Allen Greer, Mrs. W. E. Schlechter, Mrs. I. E. Enlow, Mrs. J. B. Pair, Miss Myrtle Anderson, Mrs. E. C. Brown, Mrs. L. H. Horne, Miss Marion Baker, Mrs. L. L. Harter, Mrs. George Hayes, Mrs. J. K. Baker, Mrs. G. E. Tedder, Mrs. Otis Hayes, Mrs. H. O. Earwood and Mrs. Luther Jones.

Rev. and Mrs. H. B. Twining of Washington, Rev. and Mrs. Dawson from Mrs. A. E. Clements of Jacksonville were among the out of town visitors.

School Library Fund Profits From Dinner

The annual spaghetti dinner at last Monday evening by the Palm Beach Academy School Library committee at the High school cafeteria proved to be a huge success according to the report received from Mrs. J. A. Pike, chairman of the committee.

Approximately 300 persons attended and a total profit of \$176.52 was cleared and will be (Continued on page 6)

Potential, 30 to 50,000 acres of muck may be utilized in the production of ramie. War needs have created a demand for ramie for substitutes for sisal and other fibers. It is known that ramie produces satisfactory tonnages in the Glades, even up to 40 tons per year, and that the plant grows more satisfactorily the muck than another variety of the United States.

Stripping and other destructive work has been the unsolved problem.

Experiment Station Budget Continues to Grow

The Budget Commission passed without debate the proposed budget for the Everglades Experiment Station with the additional \$12,400 item added by the Board of Control last Friday in Miami.

Local farmers, backed by John Bollinger, Commissioner Mayo and Superintendent English, got the nod from the Commission a couple of weeks ago of an addition of \$72,600, but they asked the Board of Control to express an opinion.

A hurry call went out and half a dozen local farmers with John Beacham and John Bollinger, met with the Board in board member Merschon's office last Friday in Miami. President James T. Mowry, Director of Experiments, was also present.

Beacham and the farmers, ably seconded by Mr. Mowry, convinced the Board that the Budget Commission was right and a little less than right for the general budget of \$12,400 to the Budget's Commission addition to the Board of Controls original suggested budget.

One official dubbed a committee of Glades farmers a "pioneering outfit" at a previous meeting, and Commissioner Mayo with a statement that he had to contend with such every budgeting year. In fact he stretched the rule of cordiality which usually prevails with a compliment which he had not otherwise given free.

Continued on page 6

There are other interests which have bought several hundred acres for the purpose of growing and decorating ramie in the Glades.

One manufacturer of fine papers has been seeking ramie for that purpose, as it makes an excellent paper for writing and stamping.

Through the efforts of Commissioner Mayo in the current budget for experiments on ramie, cotton, mounds, ferns, etc., water tables, marshes and other data, ramie is to be studied in the major projects under way.

Potential, 30 to 50,000 acres of muck may be utilized in the production of ramie. War needs have created a demand for ramie for substitutes for sisal and other fibers. It is known that ramie produces satisfactory tonnages in the Glades, even up to 40 tons per year, and that the plant grows more satisfactorily the muck than another variety of the United States.

Stripping and other destructive work has been the unsolved problem.

Remarkable Progress Has Been Made

In the confusion of political proposals to bring medical and hospital service to all the people, progress that has been made along those lines is apt to be overlooked. At the present time, one out of every eight Americans pays his hospital bill in advance through non-profit plans serving the population of 42 states, 7 Canadian provinces, and Puerto Rico. This number is increasing rapidly, as the public becomes aware of the facilities that are available.

The hospital bill which one person out of every ten in America has each year, averages \$75. And another \$75 is the usual cost of physician, surgeon, and special nurse. Many of the plans which provide for prepayment of hospital bills are coordinated with medically sponsored plans which pay doctor bills for hospital cases.

American initiative in meeting the health problems of the nation on a practical, inexpensive, and voluntary basis. That is the American way and is preferable to the idea of compulsion under socialized medical plans.

A Splendid "Yardstick"

The Tennessee Valley Authority recently issued a press release, according to which it paid six states and 120 counties in lieu of taxes a total of \$6,000,000 for 1947, the fiscal year ending in 1948.

The statement indicated that this amount greatly exceeded former taxes paid by privately-owned utilities. The report did not say it was comparing TVA's last year's payment "in lieu of taxes" with the taxes paid by private ownership nine years ago. Nor did it mention the fact that if TVA had not monopolized electric power development in its territory, the private companies would have continued to expand and pay increased taxes.

But the principal fact which it failed to mention was that, compared with some 7 per cent of its gross income which TVA pays in taxes, privately-owned utilities in 1948 paid approximately 245 per cent of their gross revenue in all forms of taxes, according to the Federal Power Commission. So figure for yourself how many millions in taxes TVA fails to pay which private companies are forced to pay. In other words, TVA and all similar government-owned power plants, are not bound by the tax laws which apply to every private industry and private citizen in the land.

No matter how they try to dress the picture, as government acquires more and more property and eliminates private business, with tax-exempt government competition, the tax drain on the private citizen will get heavier, until the laws are changed so that government business ventures are taxed the same as private business with which they compete.

Down To Earth Planning

There has been so much hysterical "planning" to create postwar employment, that the ordinary means by which our citizens have kept themselves out of the poorhouse for some 150 years, seems to be largely overlooked. It has remained for Charles M. Upman, Engineer-Director, American Road Builders' Association, to present down-to-earth figures showing how our people have provided themselves with jobs in the past. His points out that the nation's labor force is divided into three classifications: service industries, 50 per cent; consumer goods industries, 33 per cent; and durable goods industries, 17 per cent.

It is a fact, however, that employment rises and falls according to the fluctuations of the comparatively small segment of durable goods production, the latter is largely influenced by the amount of construction expenditures.

"During the prosperous twenties," said Mr. Upman, "private and public construction expenditures ran well over ten billion dollars annually for much of the period. That period was one of extensive road building, with the expansion of all related industries, including steel, road machinery, cement, asphalt, tar, and other materials."

In the depression thirties, construction lagged, and labor was unemployed. Expenditures were lower for residential building, highways, railroads, public utilities and public construction."

The lesson to be drawn from Mr. Upman's analysis is obvious: Every branch of government from municipal to Federal, should encourage those who employ labor, from the building of a new one-room house, to the construction of the greatest industrial plant or railroad. Public funds should be spent for permanent improvements such as roads, public buildings and the like, which serve all the people and do not compete with and discourage the man who is trying to build up a taxpaying private enterprise.

Mr. Upman concludes: Full employment and prosperity in the postwar years will depend on construction. By this means only can this country change from war production to peacetime conditions without an economic upset. The dollars spent in the building of homes, office buildings, utilities, highways, and other public improvements are high-powered investment

THE POCKETBOOK OF KNOWLEDGE

dollars, but are useless lying in banks as savings. The high employment of the prosperous twenties and the employment of the thirties have proven this."

FOR BETTER YIELDS
USE DU PONT
COPPER-A
FUNGICIDE COMPOUND

This Copper fungicide has advantages that put dollars in your pocket. Use it as spray or dust on celery, tomatoes, potatoes, cabbages, cucurbits, sugar beets, citrus fruits, etc. Gives more uniform coverage, therefore more uniform results. Plants do not need to be moist for dusting. High efficiency and stimulating effect on plants produce top yields.

For best return from the time and money you put into your crops, insist on Du Pont sprays and dusts. Order yours now.

OTHER DU PONT PEST CONTROL PRODUCTS

"Nullifexform Lead Arsenite"—A fine particle lead, especially for spray solutions. Stays in suspension, spreads evenly. Does not clog screens or nozzles.

Du Pont Calcium Arsenite—Economical and effective for control of leaf-eating insects on potatoes and similar hardy plants.

Alorox® Cryolite—Superior fluorine insecticide for tomatoes, potatoes, beans, cabbage, cucurbits, melons, etc. Extreme fineness and uniformity give maximum coverage and uniform results.

Du Pont Spreader-Sticker—Aids in more complete and uniform coverage; better wetting, and longer adherence of spray residue.

Making your car Shipshape for Summer will save wear. Sinclair-ize service will make your car Shipshape as its manufacturer recommends. You need this service now, as never before. No new cars are being made. So better not take any chances. Have your car Sinclair-ized right away.

SINCLAIR-ize SERVICE INCLUDES THIS:

To save wear on gears, transmission and differential are filled with summer Sinclair lubricants. Special Hypoid lubricant is used for Hypoid gears.

To save engine wear, crankcase is filled with Opaline Motor Oil. It stands up, lasts so long it saves you money. Sinclair Pennsylvania Motor Oil, if you prefer at 5¢ more per quart.

To save tires, tires are inspected for cuts and bruises, inflated to proper pressure.

To help prevent accidents, front wheels are removed and relubricated if your car manufacturer recommends.

To help prevent overheating, radiator is cleaned of anti-freeze, rust and sludge.

To save wear and help prevent squeaks, chassis is lubricated with special Sinclair lubricant.

To give better performance, save gasoline, spark plugs are cleaned and adjusted. Battery and oil and air filters are checked.

"SAVE WEAR WITH SINCLAIR"

HAVE YOUR CAR SINCLAIR-IZED NOW

FIGHT AND WIN!

Continued from page 1
there on, will get some more
though, and I can't complain
about losing them, for I was
very lucky not to have been in
them.

The Belgian people have

been more than kind to us and
many of them have lost their
lives because of it. We owe them
a lot.

"We have quit walking up the
hill to breakfast because it is

still dark then (about 6:30) and
the hill is as high as the Wash-

ington Monument and they
never have anything for breakfast
but bacon and eggs. We have
bread from other meals and get
condensed coffee here and there
and sugar from "C" rations and
cream from home. About seven
o'clock the ruse starts. Someone
gets up and builds a fire in the
stove and pours water on for
coffee and a piece of screen grill
for toast. Somebody tries to get
more toast on the stove and the
first toast burns up and the
others burn. Somebody gets up and
wants to have his chocolate
out of "D" ration bars, so they
holler about everybody crowding
around the stove and keeping
them out. The first one shouts
down his throat that he come
over to the school to eat and
is entitled to have the stove all
he wants. Somebody takes
somebody else's shaving water and
someone starts sweeping and
another mopping and more sol-
diers come in with muddy boots
and come up even more. Somebody
else gets up and starts to get
along with in the morning. Smith
fixes things up by boiling his dirty undershirt
and socks in one of our cooking uten-
sils and stirring them with the
only wooden spoon we have. He is
the only one who can get up
and get out of bed. It is about
ten o'clock and the ruse is over.
He comes down the stairs last every morning
with his legs in his hand
growing and moaning about
something. We call him "Knock-Knocks". He doesn't drink coffee
and wants to make cocoas and
someone else had the pot
with coffee in it and everything
else is left dirty by that time,
including the dishes so he has to
clean them up. At the same time
he finishes and wants to shave,
someone has the sink, so he
waits and complains bitterly
and accuses everyone of making
things hard for him. He used to
be a woodcutter and logger, so
somebody gets his logging boots.
They were so heavy that his
wife had to save them one at a

time. So he was two months
without a bath. We told him
when he came back to us and
he sank, but finally it arrived.
Then we wouldn't let him wear
them in the house because of
the long spikes.

expert job with a well written
story, filled with comedy and
action by a dramatic writer.

Thursday-riday comes the a

double feature, first on the list
is "Weekend Pass" with Martha
O'Driscoll and Noel Berry, Jr.,
starred and Leo Diamond. Quar-
tett, Mary Chaney and George
Barber featured. Story deals
with a woman who has a love
affair that is tender and not
without its lover's spats.

Second picture is "The

Hairy Ape," which stars Will-
iam Bendix and Sarah Hayward
and features Eddie Loder, Dor-
othy Comingore, Paul Bel-
mont, Tom Fadden in excellent
support. The screen play is
taken directly from the famous
and favorite stage play that en-
joyed suc- a healthy and pro-

longed run on Broadway a few

years ago.

The Western offering for Sat-
urday is "Wagon Tracks West."

It has a good cast of Westerners

and I'm sure is going to please

every member of the Six Shoot-
ers Club.

Singing off . . . Don't forget the
War Fund Drive coming up.

There

is a person "over

there" who is a prisoner. If so
they'll tell you when they get
back that the War Fund did a
lot toward making their con-
finement tolerable.

See you at the movies—Mal.

Our boys must keep on fight-
ing. Let's all do our part on buy-
ing WAR BONDS until vic-
tory is won. Keep on BACK-
ING THE ATTACK.

AFTER YOUR TRUCK has been through our shop you can tell by the way it runs that our treatment is good and thorough. It takes men who know all about motor trucks to make expert repairs. Our mechanics qualify for this important work. But they're hard at it these days doing all they can to keep more trucks rolling.

Your truck also appreciates good replacement parts. We sell the best—genuine International parts that are identical with the original parts built into International Trucks at the factory. Order these parts now from our big stock.

Now we'll be glad to help you make out the necessary application. But the big thing is to keep your present equipment in the best possible shape. That's the important job we'll do for you whenever you say.
